Objective

As a Frontend Developer at Digitech, I build responsive, user-friendly interfaces and integrate APIs to connect with backend systems. I collaborate with designers (Figma) to turn UI/UX concepts into functional, performant web applications.

Functional Skills

Frontend Development: HTML, CSS, JavaScript
Responsive Web Design
API Integration & Management
UI/UX Implementation (Canva Code)
Database Management: MySQL
Version Control: Git & GitHub
Skill Levels (visual placeholders):
Frontend Dev: 90%
API Integration: 85%
JS Development: 90%
Responsive Design: 88%
Database Management: 80%

Projects

Mini E-commerce Website – Live Demo 
Designed and developed a responsive e-commerce interface with intuitive product browsing and modern UI elements focused on usability and performance.

Online Pharmacy Website – Demo 
Developing a scalable pharmacy platform with backend storage and product management using PHP and MySQL.

Multi-Gym Platform – Under Construction
Building a centralized gym management platform
enabling gym owners to manage members, plans,
and payments efficiently.
